1) Rates of Vehicle Excise Duty (VED) are variable and depend on both the fuel type and the carbon dioxide (CO₂) emissions of the vehicle.
2) On-the-road price: these prices reflect the maximum VED and the £330.00 additional costs necessary to put your car on the road. Included are a standard UK delivery charge (£292 incl. VAT), new vehicle registration fee (£38.00), number plates and fuel. VAT: list price includes VAT only, at a standard rate of 17.5%.

Notes on rates of Vehicle Excise Duty
Rates of VED are variable and depend on both the fuel type and the carbon dioxide (CO₂) emissions of the vehicle. Petrol vehicles with CO₂ emissions of between 101 and 120g/km are classified in VED band AA and are charged at £75/year. Diesel vehicles with CO₂ emissions of between 101 and 120g/km are classified in VED band AA and are charged at £85/year. Petrol vehicles with CO₂ emissions between 121 and 150g/km are classified in VED band A and are charged at £105/year. Diesel vehicles with CO₂ emissions between 121 and 150g/km are classified in VED band A and are charged at £115/year. Please note that OTR prices quoted above are based on the wheel, tyre and gearbox types fitted as standard equipment. Specifying optional wheel, tyre or gearbox combinations may have an effect on the CO₂ emissions of your vehicle and therefore the OTR charge.

Warranty/service

smart offers you a 2-year warranty. Servicing is minimal and any repairs made are clearly documented in detail in service packages in order to keep the costs as transparent as possible.

Warranty

On new cars: 2-year warranty with unlimited mileage as well as a 6-year anti-corrosion warranty.

Warranty Plus

2 years’ smartmove assistance breakdown cover.

smart Service

Quick.
The smart’s modern diagnostic system ensures that any problems are quickly and accurately recognised. The car’s modular construction and smart specific service packages enable your smart to be back on the road as soon as possible.

Professional.
The high efficiency of the smart workshop is assured through highly qualified and professional employees, an unbureaucratic workshop organisation, price and cost transparency, clearly structured processes, and the use of state-of-the-art workshop technology.

Economical.
Short stays in the workshop, favourable servicing and repair costs, state-of-the-art servicing periods and, on top of that, an advantageous insurance rating make the smart a vehicle with extremely low operating costs. This has been confirmed by independent experts.

smart – a brand of DaimlerChrysler
