

Rescue cards for Passenger cars

Mercedes-Benz • Maybach • McLaren • smart

Mercedes-Benz

Preface

Dear Reader,

One of Daimler's main priorities has traditionally been to guarantee the highest possible standards of safety.

Our safety concept is as comprehensive as possible and extends to providing rescue crews with specific information about our vehicles and their safety systems.

The top priority of the rescue crew is to save lives. The rescue team must be able to gain access to the accident victims as quickly as possible without exposing them or themselves to additional danger. In order to do this, the rescue services must be properly trained. In addition, knowledge of vehicle-specific accessibility options and of the function and operation of the safety systems is absolutely essential.

In addition to its ***“Guidelines for Rescue Services”***, Mercedes-Benz now produces ***“rescue cards”*** providing information in condensed form for many model series and models.

Vehicle owners and emergency services can download the rescue cards from the internet free of charge.

The rescue cards are produced in full color. This helps you understand and take in the content quickly. For this reason, we strongly recommend that you **print the cards in color**.
