<sup>1</sup>Figures according to Directive 80/1269/EEC in the current applicable version. <sup>2</sup>Electronically limited. <sup>3</sup>All figures are based on a standard specification with smallest tyre size.<sup>4</sup>The choice of wheels and transmissions may affect CO<sub>2</sub> emissions and corresponding Road Fund Licence.<sup>5</sup>The indicated values are from official EU regulated test data and are provided for comparison purposes. Actual performance will depend on driving style, road conditions and other non-technical factors. Owing to legal changes to the underlying test procedures, it is possible for higher values to have been entered on the vehicle's certificate of conformity, which is authoritative for vehicle registration and, where appropriate, motor vehicle tax. The figures do not refer to an individual vehicle and are not part of the offer; they are provided solely for the purposes of comparison between different vehicle models. The values will vary depending on the chosen optional extras.<sup>6</sup>EUDC: extra-urban driving cycle. Testing procedures adhere to EU Directive 93/116.<sup>7</sup>Figures in accordance with Directive 92/21/EC in the version 95/48/EC (mass in running order, fuel tank 90% full, with driver, 68 kg and luggage, 7 kg for vehicles with standard equipment). Optional equipment and accessories generally increase this figure, which means that the payload is reduced accordingly.<sup>8</sup>Whichever comes first, service interval shown via multifunction display. All road vehicle registrations are subject to Vehicle Excise Duty (Road Fund Licence), which varies in accordance with the vehicle's CO<sub>2</sub> emissions. A first year rate for each taxation band will apply. The table below shows the bands (A–M) created by the DVLA and the corresponding Road Fund Licence. CO<sub>2</sub> emissions are listed in the technical data on pages 31–32 and the relevant Excise Duty is reflected in the on-the-road prices on page 08.
